**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 16-20, drawn to a semiconductor device having a gate oxide of multiple thickness, 257/411.

Group II, claim(s) 1-15, drawn to a method of forming a multiple thickness oxide layer on a silicon substrate 438/216.

The inventions listed as Groups II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Instead of forming the polysilicon layer and masking the layer before implanting oxygen into the layer, the device could be made by selective chemical vapor deposition with the oxygen dopant implanted at the same time the layer is formed.
